> About Enka

The College was founded in 1998 and quickly established itself as a respected training centre. From the outset, Enka has remained focussed on teaching the fundamentals of the setting out process, leading to a steady stream of qualified site engineers. Enka identified a skills gap within the construction industry and developed intensive training courses which give candidates a solid understanding of principles and practical skills that would normal take years of site experience to acquire.

> The 2 week Enka course

Must have at least 2 years site experience.

For anyone who has site experience and wants to move into site engineering to further their career.

- > The 2 week theory and practical module takes place at the Enka Engineering College in Swindon. Included in the theory and practice module are
- Site Engineering & Construction Handbook
 - Accommodation Tools & equipment
 - Final assessment Careers database entry
 - Pre-programmed calculator

- > The conclusion of the course is a time-based assessment of the students ability to accurately complete a site setting out process, held in Swindon at end of 2 week course. If failed 1 week free training and repeat assessment. Real world construction site scenarios. Industry recognised qualification. Unsuccessful? Don't worry, we offer one week free training, accommodation and re-test.

Everything included, even accommodation for £1,100

“

“The trainer helped to make complex ideas easy to understand. I am amazed at the amount of knowledge that I acquired within two weeks.”

Xavier Craig

“Enka training set me on the path to a successful career.

Their knowledge is phenomenal. I will keep recommending Enka to friends.”

Chineme Ofoma

”

> The 12 week **Enka course**

Under 2 years site experience. Ideal for anyone who has little or no site experience but wants to gain valuable training to enable them to work as a site engineer.

> 10 weeks distance learning on the Enka virtual construction site, training at your own pace. The distance learning part of the course is designed to allow students to work where they work at their own pace whilst having access to support from the College. Within this period you will learn all construction concepts using the Enka Virtual Construction Site before attending the final 2 week theory and practice course. If you miss any training within this period you can extend the course duration time with no extra cost incurred.

> The conclusion of the course is a time-based assessment of the students ability to accurately complete a site setting out process. Students are tested on the practical application of setting out theory and correct use of instruments.

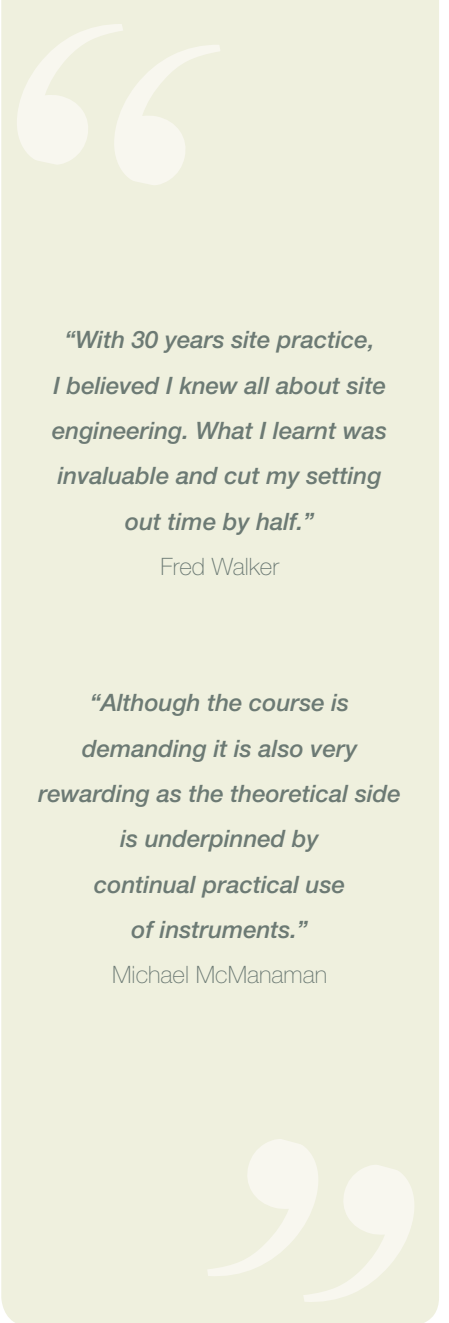

The assessment is based on a real life scenario, with students working from drawings and marking out positions.

Real world construction site scenarios Unsuccessful? Don't worry, we offer one week FREE training, accommodation and re-test.

Everything included, even accommodation for £1,300

> Virtual **Construction Site**

A new concept in engineering training. The virtual site allows students to observe and practice building everything that would occur on a real site. Of course all this practice takes place in the comfort of your own surroundings, studying when you want at your own pace. Using this approach, students gain all the confidence and knowledge they need without the health & safety restrictions, weather delays and cost of training on a real life building site.
